☐ Cunnilingus
☐ Fellatio
☐ Penile Penetration of the ☐ anus ☐ vagina
☐ Penetration with an object of the ☐ anus ☐ vagina
☐ Sexual Intercourse
☐ No Disclosure
☐ Inconclusive Disclosure
☐ Other: _____

Scenario:

Child presented as a 16 year-old Caucasian female who's physical, cognitive, and social abilities were within normal limits. The child was pleasant, cooperative and easily engaged into conversation. The results of the interview are consistent with that of a child who has been sexually abused regarding the suspicion of sexual abuse and did provide information to corroborate the suspicion that the child was sexually abused. The child was interviewed using

anatomical drawings. Child labeled the female breasts as boobs. Child stated that her step father James Hagan uses his hand for a "littie twister" grabbing and squeezing her boobs. These findings are categorically based on the statements and affect of the child during the evaluation, and these findings are not based on any corroborative information that may be identified outside of this evaluation. This is not a verbatim transcript. Please see the CD for further details

Recommendations:

1. Continue law enforcement investigation.
2. Conduct DHS investigation.
- 3.
- 4.
